

receiving code by the first program, the code originating from a second program running on the second abstract computing machine; and
running the code on the first abstract computing machine by the first program.

63. A computer-readable medium containing instructions for controlling a data processing system to perform a method, the data processing system having a first abstract computing machine and having a second abstract computing machine, the method comprising the steps of:

running a first program with code on the first abstract computing machine; and
sending a portion of the code from the first program to a second program running on the second abstract computing machine such that the portion of the code is received by the second program and run on the second abstract computing machine by the second program. *✓*

REMARKS

Claims 34-63 are pending in the application. Applicants have canceled claims 1-33 without prejudice and have added claims 34-63 to more particularly point out and distinctly claim the subject matter of Applicants' invention. The Examiner is respectfully requested to consider this Preliminary Amendment prior to examination of the application. No new matter has been added.
